Tamir Ashwal – Software Developer

0526787848 | tamirashwal@gmail.com | GitHub

Work Experience:

Private Mathematics Tutor (2023 – Present)

- Teaching private lessons to high school and university students, with a focus on logical thinking and exam preparation.

Projects

Unitree Go2 Robot OpenClaw: https://tamirashwal.github.io/Go2/
- Architected a **modular skill library** with an **LLM-based dispatcher**, translating high-level intent into **validated, safety-constrained robot actions**
- Developed **custom Python skills** over the **Unitree SDK** (**DDS**) and integrated **YOLOv8** object detection

ChessWhisper – AI Chess Platform with a Custom C++ Engine - GitHub:
- Built a custom C++ chess engine (negamax, **alpha-beta**, quiescence search) with an **ML-based evaluator**.
- Developed a native **Android** app (**Java**, **MVVM**) with engine-powered modes: live evaluation bar, real-time move-quality feedback, and play vs. engine
- Built a **Node.js/Express REST + WebSocket** server with authoritative game clocks, **Elo** rating, matchmaking, and **JWT** auth with rotating refresh tokens

More projects: Projects

Education & Courses:

Masters Information science, Bar-Ilan University (2026 – Present).

Computer science, Bar-Ilan University (2023 – Present)
- High academic achievements and grades in the following courses:
  - Object-oriented programming, Probability, Data structures, **Operating systems**, Introduction to Robotics, **HRI – Human-Robot Interactions**, Principles of Programming Languages, **Advanced Algorithms**, **Secure programming, Network & Cyber Security**.
- Participant in a research workshop (HRI – Human-Robot Interaction) developing an LLM-based control system for the Unitree Go2 robot.

Military Service:

- Full combat service in Combat Engineering in an elite unit, including completion of an intelligence and reconnaissance course.
- Took part in projects integrating experimental drones into the unit's operational activity.

Skills

- C, Java, Data structures, Algorithms, Problem solving, Analytical thinking, Object oriented programming, operating systems, Git, Statistics, C++, ROS2, HRI, Programming Languages Principles, Jira.

Languages:

- Hebrew – Native, English - Fluent
